

## BENZEFOAM™ EMOLLIENT FOAM INSTRUCTIONS FOR USE

**Avoid contact with hair, fabrics or carpeting as benzoyl peroxide may cause bleaching or discoloration.**

BenzEfoam™ is convenient to use with two application options to minimize the risk of bleaching. BenzEfoam™ can be used as either a **leave-on** or **short contact** therapy.

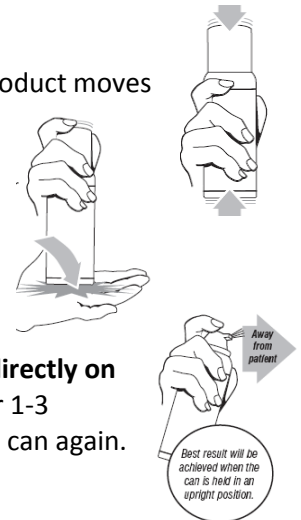

### PRIME CAN BEFORE INITIAL USE:

1. Gently push up on actuator with thumb until tab breaks. Shake can vigorously (until product moves inside can).

2. Firmly strike bottom of can onto palm of other hand or a hard surface at least 3 times.

3. Holding can upright over sink, direct initial spray to a non-skin surface. **DO NOT spray directly on the skin as the initial spray may expel cold, liquid propellant.** Press down on actuator for 1-3 seconds until foam begins to dispense. If foam does not dispense within 3 seconds, prime can again.

**BEFORE EACH USE:** Shake can vigorously. Firmly strike bottom of can onto palm of other hand or a hard surface at least 3 times.

**DURING USE:** Holding can upright, dispense BenzEfoam™ Emollient Foam into palm of hand and apply to affected area once daily, or as directed by a physician.

**For use on the face,** use a dollop the size of a marble. **For use on the back and chest,** use a dollop the size of a whole walnut. Rub in until completely absorbed. Wipe off any excess foam from actuator after use.
